It is the third game in the Midtown Madness series. The game was developed by Digital Illusions CE and published by Microsoft Game Studios. This marked a change from the developer of the first two games, Angel Studios, who had moved on to work on the Midnight Club series. The Xbox-only version and developer change announced a significant graphical improvement to maintain the console's graphical standards. Gameplay As with previous games in the series, the player drives one of several vehicles around open world maps modeled after real-life cities. Midtown Madness 3 recreates the cities of Paris and Washington, D.C. in the game. City maps cover smaller areas than real-life cities, though they are larger than their comparable counterparts in Midtown Madness and Midtown Madness 2. In single-player mode, the player can roam freely, run, or complete objective-based missions. In Cruise mode (free ride), the player can change the number of pedestrians and the change the weather and season, time of day and season, and collect car-specific painting jobs, in a user-selected car. In Blitz races, the player crosses all checkpoints in any order and races to the finish line before time runs out. In Checkpoint races, the player passes through checkpoints in any order and arrives at the finish line before his opponents. In Work Undercover mission mode, the player attempts to complete driving-based goals that vary for each city: in Paris, the player works as a delivery man, taxi driver, driver, security guard, ambulance driver, police officer, and special agent, while in Washington, D.C., the player works as a pizza delivery man, rental car driver, limo driver, car salesman, stunt driver, police officer, and private eye. The game supported Xbox Live for online multiplayer games and featured a split-screen mode for offline multiplayer. The extra downloadable content was available via Xbox Live to expand the game's original premise. Capture Gold is a mode in which gold is hidden around the city and the player must take it to a hideout. Other players will attempt to steal gold. Checkpoint has players competing against others on predefined tracks around the city. Cruise is a free-roam mode around the city with others. In Hunter, one player starts as the Hunter and everyone else in the game is Prey. While the Hunter captures Prey, they in turn become Hunters, and the last person who is Prey is alone as the winner. Stayaway is a mode in which the one who keeps the rabbit for the most time wins. Tags is a mode in which players chase each other and try to bump into each other's cars. Development Midtown Madness 3 was announced as being developed in April 2002 as the exclusive title for Xbox, with a tentative release date in late 2002. [2] An initial development construction was first presented to the public in May 2002.
